

## FamInstExport Application

### Application Overview / Market Segment Introduction:

**FamInstExport** is an add-on application developed for Creo (Pro/ENGINEER) that automatically Exports all the Creo Family Table Instances as individual files that can be of any Neutral Format(s) like .IGES, .STP, .PDF (3D) or as native Creo (Pro/ENGINEER) Part (.PRT) files.

### Current Scenario (Without Application):

#### User need to Manually:

- Need to open individual instance manually.
- Need to export each type individually.
- All the type needs to segregate in separate folder.

#### Negative consequences:

- User will consume more time to export each instance.
- 3D PDF creation for each instance will take more time.

### Positive Business Outcome:

- **ROI** – quick Return on Investment (ROI) considering the significant time savings.
  - **Speed** – One clicks solution to get entire output.
  - **Enhanced User Productivity** - Eliminate Designer/Creo User's non-productive (manual entries) activities, Saving up to 80-90% of output time.
- **Standardization** – Standardization of Process as per company standards.
- **Quality output:**
  - **Error Free** – No cause for errors.
  - **Simplify tasks** – Fully automated process.

**How it adds value:**

- Works with Creo (Pro/ENGINEER) Base (Foundation) Licenses
- Simple and Straightforward UI enables easy usage
- Works in conjunction with PTC's Windchill/PDMLink, or Intralink
- Works on a single file or as Bulk conversion (folder based)
- The 3D PDF output is customized to desired output, that can also include Title Block info, etc.

**List of satisfied users:**

- Molex India Pvt Ltd
