

Spell Check Application

Application Overview / Market Segment Introduction:

Spell check Application is working base Creo (Pro/ENGINEER). Spell check application will fetch all notes from the drawing and compare each note with dictionary. It will highlight the misspelled word in the drawing.

Current Scenario (Without Application):

User need to Manually:

- Need to verify each word for misspell.

Negative consequences:

- User will consume more time to check all notes.
- Error can occur in manual verification.

Positive Business Outcome:

- **ROI** – quick Return on Investment (ROI) considering the significant time savings.
 - **Speed** – One click solution to get misspelled word in the drawing.
 - **Enhanced User Productivity** - Saving up to 80-90% of validation time.
- **Standardization** – Standardization of Process as per company standards.
- **Quality output:**
 - **Error Free** – Eliminates Spelling errors.

How it adds value:

- Works with PTC Creo (Pro/ ENGINEER) Basic Licenses.
- User can also add words in dictionary.

List of satisfied users:

- L&T Technologies Services - Chennai.
- Kirloskar oil engine (KOEL)
