

About Automated Document Generation

Automated Document Generation upon New Part Creation in Windchill is a Custom Feature developed by CADOpt Technologies. This feature helps the Design Engineers to automatically attach set of Documents to the newly creating Part from the Predefined Library Templates. Also the attached Documents will get stored in user defined location after the New Part Creation.

Predefined Document Templates in Windchill

Documents attached automatically after creation of New Part

[Click here for the Sample Video](#)

Highlights

- Libraries with Predefined Templates are selected while creating a Part and the Documents in that Library will be attached to the new Part.
- Design Engineers can able to attach regular Documents of a Part on an ease.
- Complete track record of each part created can be maintained on a single click
- Formats of the Document remains Unchanged while converting from New Document to Template automatically.

Benefits

- **Speed** - One Click to solution to automate the Link of Part Document Creation
