

About Windchill ERP Integration

Windchill ERP Integration is a special feature available in Windchill helps in incorporating any ERP used in Industries along with Windchill. This feature takes all the required Information of a Part,BOM,etc., convert it into an XML file. When a Promotion Request for a Part or BOM gets approved, the XML file will get automatically created in a Centralized Location and that XML File will be pulled over by the ERP.

XML File Created in a Centralized Location

Details of the BOM Published to the XML File

[Click here for Sample Video](#)

Highlights

- User can also add Custom Attributes to the XML File.
- Any Reference documents attached along with the Part or BOM can also be Propagated in the XML File.
- XML File can be created automatically by Approving the Promotion Request of Part/BOM or even manually sending them to DT.
- We can configure the XML files to be Pulled over by ERP on a scheduled Basis and also immediately once after the XML file got created.

Benefits

- **Speed** - Feasible method to incorporate Windchill and ERP.
- **Error Free** – No errors
- **Enhanced User Productivity** - Easy for all users to Publish from Windchill to ERP
- **Standardization** – Standardization of Process as per company standards
- **ROI** – quick ROI considering the significant time savings
