

# Library Part Selector

## Application Overview / Market Segment Introduction:

Library Part Selector application will help the users to search/select the available Standard parts from library & download the same to the workspace.

## Current Scenario (Without Application):

### User need to Manually:

- Each & Every time user has to search the available parts.
- Stock status needs to be got from store (Other department)

### Negative consequences:

- User will consume more time to Search available parts.
- Most of the time, user will generate the new / repeated parts.

## Positive Business Outcome:

- **ROI** – quick Return on Investment (ROI) considering the significant time & cost savings as duplicate parts are reduced.
  - **Speed** –One-click solution that automatically determines and get the nearest available size of fasteners from Library.
  - **Enhanced User Productivity** - Eliminate Designer/Creo User's non-productive (Repeated parts creation) activities, saving up to 90% time
- **Standardization** – Standardization of Process as per company standards.
- **Stock Monitoring** – Providing live Stock Status of standard parts.

## How it adds value:

- Works with PTC Creo (Pro/ ENGINEER) Base (Foundation) Licenses
- One-click solution that automatically determines and get the nearest available size of fasteners from Library.
- Works in conjunction with PTC Windchill/PDMLink or Intralink
- Enables you to choose the Size and Min, Max Length of the standard parts like Fasteners.
- Will also provide the Stock Status
- Avoids creation of new parts / repeated parts every time.
